Supra – The newly designed curved platform lift for indoor and outdoor use

Description

Tailored solution for even narrow stairs

The new Supra wheelchair platform lift has been developed specifically for curved stairs and for installation on the inner (banister) side of the staircase. Stairs are kept accessible for other users at all times due to the compact size and fold-away platform, which can also be parked “around the corner”. When folded away the platform closes so compactly that the new Supra model needs only 285 mm depth and 1290 mm height. Additionally, the safety bars fold away in the platform. Due to these minimum space requirements, Supra is an ideal solution even on narrow staircases in private and public surroundings. Supra can be installed in less than one working day.

0 degree inclination offers flexibility

The new Supra is available with “0 degree” inclination which is an ideal solution on stairs with landings. The rail is designed to match the bends and thereby follows the stairs perfectly. This option makes Supra a ideal solution for metro and train stations.

Premium quality guarantees safety

High precision construction and manufacturing sustain product excellence and high quality standards. Long life tests during the development make the Supra one of the most robust and reliable products on the market. The lift is equipped with anti-crushing and anti-shearing safety devices. Its capacity reaches 300 kg and is controlled by an overload sensor. Supra (CE, TÜV certified) is compliant with the new European Machine Directive 2006/42/ EC and already conforms to European standard EN 81-40.

Outstanding design

Supra is made of high-value materials. Rail, platform and safety bars are made of anodized aluminium which makes the product durable and easy to clean, even in outdoor application. Its new design fits with the look of the RPsp, his pendant lift for straight stairs. Both lifts share the same soft colors and rounded shapes. Private as well as public customers benefit from a long-lasting product which combines reliability and outstanding design.

Supra – Key features at a glance

- Applicable on curved staircases or staircases with landings in private or public areas, indoors and outdoors
- Standard platform compactly folding
- Installation: In less than one day
- Controls:
 - o On board controls, joystick-key operated
 - o Radio remote control for calling/sending the lift via joystick-key
- Safety:
 - o “Hold to run” controls
 - o Handle
 - o Emergency push button
 - o Safety edges: Anti-crushing, anti-impact and anti-shearing safety devices with automatic stop
 - o Automatic safety bars
 - o Auxiliary power system (20 minutes, in case of electrical power outage)
 - o Emergency lowering device in case of electrical power outage (available soon)
 - o Audio visual alarm
 - o Load control
 - o Overspeed governor
- Other features or options:
 - o Automatically folding platform
 - o Folding seat
 - o Different platforms sizes
 - o Automatic access flaps
 - o Outdoor application with platform protection cover
